

MEMORANDUM FOR: Deputy Director of Central Intelligence
SUBJECT : Over-Ceiling Authorizations to Various Components

1. Annexed are two memoranda, one of which requests an additional position for the DCI Area and one of which requests an additional position for Communications.

3. I spoke to you briefly about the Comptroller's Office. A requirement for additional positions has been submitted and probably could be justified. The additional positions are needed for program analysis (a new function in the Comptroller's Office). They are also justified by the very considerable increase in the workload of the Comptroller's Office since 1957 which has been accomplished with no increase in personnel. Figures showing this increase are set forth in the attachment (Tab A). We have been able to accomplish certain economies which should serve to reduce the total requirement for additional personnel and I am selecting rather arbitrary measure of our actual requirements.

4. 42 positions are required by Communications to continue the implementation of staff communications services under the program.

JOHN A. BROSE
Comptroller
